Core Skills:

Languages/Frameworks/Tools

- Java, JavaScript, C#, Objective-C
- React, Polymer, React Native, NPM
- SQL, Liquibase, Elasticsearch
- AWS (S3, SQS, SNS), Keycloak, Jasper Reporting
- Artifactory, Jenkins, Bitbucket pipelines
- Git, Bitbucket, Github

Skills and Experience

- Implementation and maintenance of microservices
- Refactoring of code, from small scale to project wide
- Maintenance of existing codebases, both new and old
- Creation of libraries for internal use
- Prototyping and researching new languages/framework/tools
- Running small teams for feature implementation
- Onboarding new graduates, presenting within company

Work Experience:

Software Engineer | January 2018 – Present | Retriever Communications

Working as a developer on a variety of internal and customer facing products. Some examples of the products are:

- Microservices for coordinating and managing various parts our system, like emailing, reporting, file management, creation of bespoke forms.
- Off the shelf and bespoke mobile applications, that run on an in-house cross platform development environment.
- Libraries to support our services, speed up production and improve stability. For example logging, facilitating interactions with queues and cloud storage, client libraries and object libraries to provide a stable interface between services.

Education:

Bachelor of Science – University of Otago | Major: Computer Science | Minor: Statistics

Graduated December 2016.
